

Universidad Panamericana, Mexico

We come from Mexico and we are law students. Our exchange semester was the result of a partnership between our university and the University of Würzburg. We decided to go to Germany because we wanted to get to know the German culture and to travel around Europe.

In Würzburg, we found a university that offers a lot of opportunities as well as a great variety of courses, highly qualified Professors and an incredible Erasmus environment. The university offers law courses in many different languages. That is the reason why we could take some classes in English and Spanish. We also had the opportunity to take seminars that started throughout the semester like Australian and New Zealand Law. The university offers free language courses to all exchange students, not only German language course, but also a huge variety of other languages that helps you to improve them, like English.

People are amazing, kind and very helpful. From the beginning of our stay we were assigned a tutor that helped us with all the paperwork and processes we had to manage from the very beginning of our arrival in Würzburg and throughout the semester.

The facilities of the university are big and in good conditions. It is very easy to find a place to live during your stay in Würzburg because there is a company that helps students and it assigns them a place in one of the many dormitories belonging to the university.

The city is really beautiful and magic! Due to its location, it is really easy to travel across Germany and its beautiful cities. Despite not being very big, Würzburg has a lot of places to visit and lots of restaurants and bars to go out at night.

Our expectations were exceeded by far regarding the university, the city and the country! We had an amazing semester, full of unforgettable experiences! Würzburg has definitely a lot to offer!
